

Professional Practice Advisory Committee

Committee Goal: Prepare architects to successfully practice into the future.

This committee helps to identify emerging trends in practice, facilitate and broadcast communication about the wide range of topics that are relevant to today's practice of architecture in all its various forms. In an effort to continue to coordinate and build relationships with other AIA Chapters and Components, Allied Members, outside organizations, and other partners to promote opportunities for AIA California members, the following Professional Practice subcommittees were established –

SUBCOMMITTEES

Business and Operations

- Identify existing, evergreen, and emerging issues
- Scan and mine for information pertaining to Practice
- Disseminate information and access to resources to help architects practice successfully
- Support architects in all stages of career development
- Elevate the conversation about EPs

Education

- Increase literacy and culture of the profession in California about the future of Practice through communications and a coordinated educational effort for all
- Equip members with knowledge and expertise

Technology

- Promote the value of technology to members and the types of technology firms want for their staff
- Maintain webpage – Collect data from outside sources and member feedback
- Continuously identify new and emerging technologies to add to tool
- Extend program to phase II – Develop more user functions, forum, possible rating system

2030 Commitment

- Mine existing information regarding the 2030 Commitment
- Develop database with library of resources
- Build partnerships to further networks – California CACE
- Establish website
- Create semi-interactive tool
