This session qualifies for 1 AIA LU HSW – AIA CA will submit for you

A recording of this presentation will be made available on our website soon

LEARNING OBJECTIVES

Assess drivers for offsite and modular construction in the U.S. based on macro-economic context, labor shortages, quality assurance, and cost escalation

Review current and emerging offsite systems, including panelized and volumetric modular solutions along with the opportunities and challenges they present for project timelines, construction quality, and compliance with building and energy-efficiency codes

Discuss the changing role of the architect in the offsite and modular construction supply chain, design for manufacture and assembly workflow, construction quality, code compliance, and business models

Share four case studies of specific architects in offsite and modular alternative practices as illustrative examples of the changing role of the architect
