Latimer D19-D21 New Microscope Lab

Project 12069A

The University of California, Berkeley is seeking an Executive Architect to perform design services for the renovation of Latimer D19 and D21 to prepare the room for a new laser system.

Latimer D21 was originally designed as an NMR & ESR Lab. Latimer D19 was originally designed and still is an office. Between the two rooms, the space is approximately 1,100 square feet. D21 contains two (2) sinks, one (1) fume hood, one (1) toxic gas cabinet, some built-in benching, and various equipment and furnishings. The space features an open ceiling with a Unistrut support system used for laser curtains and other suspended elements. The intention is to keep the Unistrut support system in place.

The client would like to re-purpose the space to accommodate two (2) lab spaces, a tech room, a prep room, and a control room. The spaces will have specialized and localized HVAC controls for the optical tables.
